

Project FeederWatch

Cornell Lab of Ornithology • 159 Sapsucker Woods Rd. • Ithaca NY 14850

Educational Group Discounts

Order Form and Instructions

Qualifications

A group that teaches its members about birds and bird feeding can qualify for a group discount if they would like to include Project FeederWatch as part of their educational program and would like all of their participants to participate in the project from separate sites. In order to qualify, a group leader or sponsor must register all of the participants with a single payment, and all group participants must submit their data through the FeederWatch web site.

Participation fee

Project FeederWatch is supported by participant fees. Educational groups that register six or more participants can qualify for a discount according to the following fee schedule:

Project FeederWatch Group Rate	
Number of participants	Price per participant
1-5	\$18
6-10	\$15
11+	\$12

Instructions

A group leader or sponsor must fill out the enclosed application form and send it to Project FeederWatch along with the names and addresses of the group members who wish to participate and a single payment for the entire group. If group members are under the age of 18, please provide the age range for the group to assure they are not sent solicitations.

What group members receive

Each participant in the group will receive an instructional kit; *Winter Bird Highlights*, FeederWatch's annual summary published each fall; and access to a digital version of *Living Bird*, the Cornell Lab's award-winning magazine. Kits are shipped in the fall or approximately three weeks after payment is received during the FeederWatch season.

FeederWatch as educational tool

For years FeederWatch has been used by informal and formal educators to teach concepts relating to ecology, biology, mathematics, computer science, writing, art, and history. Through participating, FeederWatchers become confident observers of their backyard birds.

We encourage you to teach your members basic bird identification tips, such as taking detailed notes and drawing sketches, as well as how to find and use birding field guides. Consider holding winter bird feeding workshops to teach members how to attract, feed, and identify birds.

Questions or advice?

If you have any questions about the FeederWatch project, please don't hesitate to contact us:
