

# Bird-Window Collision Study Tally Sheet

**Instructions:** Use this tally sheet to record information about your residence and bird vs. window collisions. Fill out this page even if you are unaware of any collisions. Fill out the next page for each collision you are aware of at your living space between February 1, 2025, and April 30, 2025. Please visit our website at [feederwatch.org/windows](http://feederwatch.org/windows) for instructions and return to the web page after the end of the season to submit your observations. If you have questions, please email us at [feederwatch@cornell.edu](mailto:feederwatch@cornell.edu).

## General Information

Your FeederWatch ID number \_\_\_\_\_

What is the approximate square footage/meters of your living space? \_\_\_\_\_

Is the building in which you reside single family \_\_\_\_\_ or multi-family \_\_\_\_\_ ?

Approximately how many days per week (in an average week) are you home and able to detect window strikes? \_\_\_\_\_

## Window Information

Fill in the chart below. See the instructional web page ([feederwatch.org/windows](http://feederwatch.org/windows)) for more information.

- Choose five windows around your residence and select names for each, for your own reference. If you feed birds, please choose the window closest to your feeders for one of the five. Then select other windows scattered around your home.
- Record measurements in feet or meters (be consistent), and indicate below the chart which method you chose.
- Enter a glass type for each window, or leave blank if none apply: clear, coating/"Low-E", tinted, privacy film/mirror, or other (describe).
- If you have a window strike mitigation system in place, choose the type from these choices: none, decals, strings secured across outside of window, or other (describe).

	Window name	Length	Width	Distance to nearest vegetation	Distance to nearest feeder, if present	Facing feeders (Y/N)?	Glass type	Existing strike mitigation
A								
B								
C								
D								
E								
If you are aware of a bird-window collision on any window of your home that is not listed above, please record information about that window below or on a separate sheet of paper.								
F								
G								

All measurements in feet/meters (circle the one you chose).
